
Ocean CREST Alliance: Dedicated to Honor, Protect and Restore the Health of the World's Oceans and the Life of the Earth's Systems through Conservation, Research, Education, Science and Technology

Work will be conducted in four main areas:
Fisheries, Ecosystems, Coral Reefs, and Marine Biodiversity

The Information gathered and the various media produced will provide educators, government leaders, policy makers, conservation groups and the entire public sector with valuable information. We need to understand how the Oceans work, why they are vital to our existence and ultimately, how they can be repaired and protected

OCA will work to assist in the design and establishment of the world's Marine Protected Areas (MPA's)

Research and Education Projects 2014

- Lionfish Program
- Rapid Ecological Assesment (REA) for proposed Long Island Marine Management Area (LIMMA)
